PROJECTS

AI Poem Generator

JavaScript, HTML + CSS, API | Jul 2026

Created an AI-powered poem generator that produces short poems based on user input.

- Integrated an API and used JavaScript to process user requests and display results
- Designed and styled the application using HTML and CSS.

Dictionary Application

React.js, APIs | Aug 2026

Built a dictionary application that displays definitions, examples, synonyms, and images for searched words.

- Integrated multiple API's to retrieve and display word information.
- Used React state, loops, and components to dynamically update search results.

Personal Portfolio

HTML, CSS, Bootstrap | Jul - Aug 2026

Designed and developed a responsive portfolio website to showcase projects, skills, certifications, and background.

- Used HTML, CSS, and Bootstrap to create a clean and responsive layout.
- Added project links so visitors can view completed work and source code.
